

AUTHENTICATION TIPS

This document provides basic information on the authentication types offered by Gale, so you can choose which works best for your users.

SINGLE SIGN-ON (SSO):

Users can access your Gale resources using Google, Microsoft, Clever, or ClassLink SSO.

Once users are signed into one of the above options, they will not be prompted for a password.

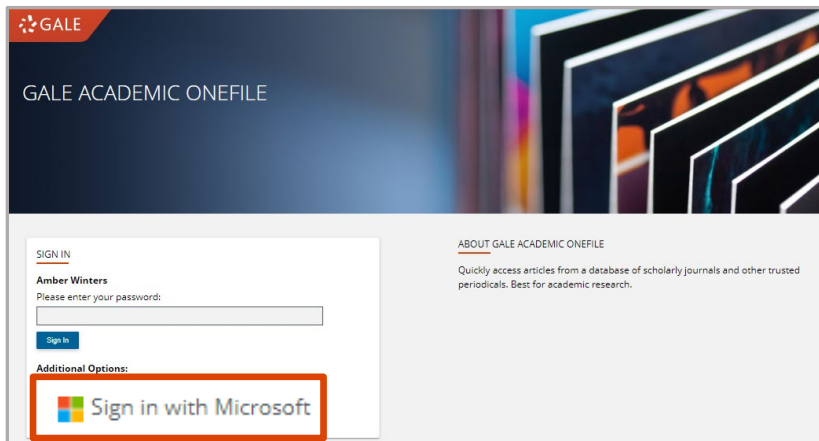

LMS INTEGRATION:

Gale resources work with all LTI 1.0 certified systems, including Canvas, Schoology, Blackboard, and Brightspace.

No password will be required, and users can access your resources right on the platform.

IP AUTHENTICATION:

Institutions can provide their IP addresses to allow users on those IPs to enter without a password. This is helpful for in-library or in-school work.

LEARN MORE:

Your **Customer Success Manager** can review your options and discuss best practices for implementation. To find your Customer Success Manager email:
Gale.customersuccess@cengage.com
