

Refine Your Searches With Gale's Topic Finder Tool

Gale's **Topic Finder** is a tool that helps users discover **topics** and **themes** within a collection of documents or articles. It uses advanced algorithms to **analyze the content** and **identify common subject areas**. Users can enter a **keyword** or **phrase**, and Topic Finder generates a **visual representation** of related topics, allowing researchers to explore connections and gain insights into the content they are studying. It can be a helpful tool for **identifying trends**, **finding related concepts**, and **refining research topics**.

TOPIC FINDER
Discover topics and results related to your search.

[Start the Topic Finder](#)

Select the **Topic Finder** to further explore a topic.

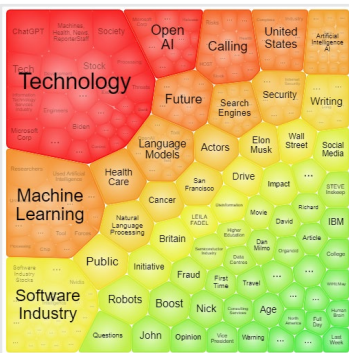

This tool can be accessed under the filtering options and from the top toolbar on a search page.

Topic Finder

Visualize connections between search terms and topics and view relevant articles for those topics.

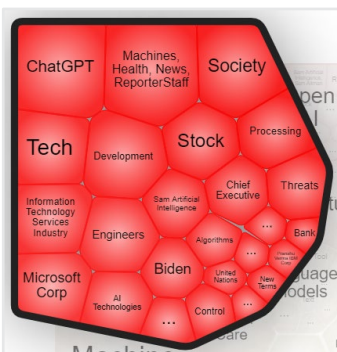

[Go to Topic Finder >>](#)

You can also begin your research by searching visually using the Topic Finder located at the bottom of your In Context page.

There are two ways to visualize which words and subjects are found most often in the text of your search results: **Tile** and **Wheel**.

Keywords shown in the graphics are those **found most often** in the text with your search term, leading to discovery of common terms and specific topics.
