GALE'S TRANSLATION FEATURES
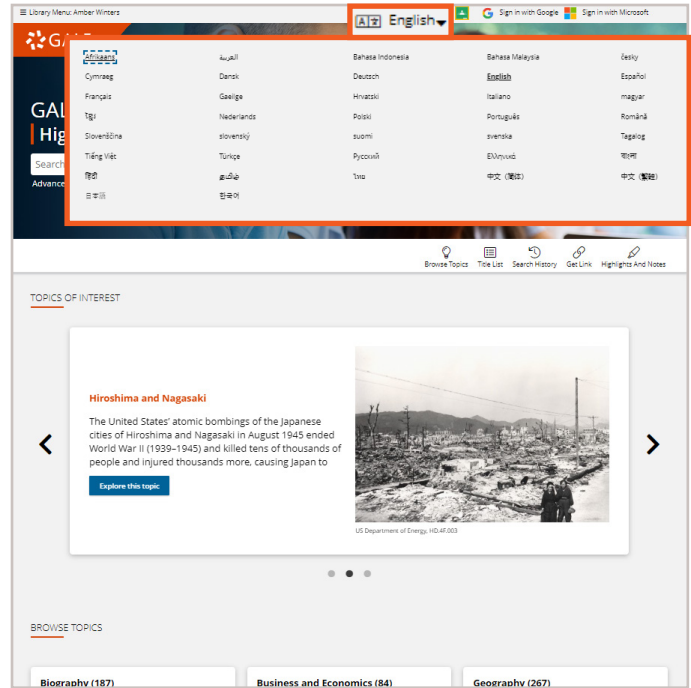

Increase Accessibility for All Users

Gale's language translation features allow your users to change the language of the platform navigation and article text. An additional text-to-speech feature allows translated articles to be read in that language, enhancing the learning experience for users at all levels.

TRANSLATE THE INTERFACE

Translating the interface changes navigation and tools to simplify user discovery.

- Select **English** in the gray bar at the top of any screen.
- Use the drop down to select language of choice.
- This will follow users throughout their session.
